PROFESSIONAL SUMMARY

Results-driven Technical Product Manager with a frontend engineering background, specializing in building revenue-generating digital products. Proven track record of leading end-to-end product development from requirement gathering and feature definition to UI architecture, API integration, and production deployment. Combines user-centric design thinking with data-backed decision making to bridge the gap between business goals and engineering execution. Experienced in e-commerce platforms, AI-powered automation tools, and growth-focused product development.

CORE COMPETENCIES

Product Management • Product Strategy • React.js • REST API Integration • Frontend Architecture • E-commerce Development • AI & Automation • Agile/Scrum • Data-Driven Decision Making • User Research • Business Prioritization • Digital Marketing Analytics
